

Child Case Study

Child Name:- Divyanshi

Mother Name:- Rinki

Father Name:- Ravindra

Total Siblings:- 3 (2 sisters and 1 brother)

LC name:- Poothi

Date of Birth:- 11.09.2014

Village:- Ramgarh

LC joining Date:- 11.09.2014

Current Level:- 4

Brief Description of Case Study

Learning centres are the locus point for all round development of students. From academic improvement to inculcation of values, that positively affects the holistic growth of a student. The learning center in Poothi has similarly become the source of knowledge to Divyanshi, a student in this learning center. Divyanashi lacked discipline in the initial days of joining the learning center. The child hardly wanted to take lesson seriously. Moreover, it was very hard for the teacher as well as her friends to get her to the learning center. The teacher had to make continuous visit to her house and meet her parents for generating motivation, which encouraged the parents to ultimately stimulate Divyanshi to attend the learning center. Attending classes in learning center has immensely improved the child in terms of her etiquette and values. She has become more organized and disciplined in planning out her academic lessons and accordingly working on them.

The teacher and her parents have a great role in bringing Divyanshi on track, however without her own hard work initiative it would not have been possible. In the process of encouraging the child to attend the learning center, it is important to point out the fact that, Divyanshi have indeed evolved in terms of understanding and similarly realized the importance of education. To be in touch with the learning center, her understanding capacity, self-motivation and interest have been developed. Thus, the learning centers are only working as a medium to improve the education of the but also develop disciplined and self-driven individual, just like Divyanshi.
